SUMMARY

Software Engineer with hands-on experience in full-stack development, AI-driven applications, and REST API development. Built web applications and AI-powered systems using Python, TypeScript, React.js, Next.js, SQL, LLMs, and modern development tools. Strong foundation in Data Structures, Algorithms, OOP, DBMS, and SDLC, with an interest in backend engineering and AI-driven applications.

FREELANCE EXPERIENCE

- Freelance Web Developer - Thete Agro Impex

Client project | theteagroimpex.in

- Developed and deployed a responsive B2B website for an agro-products export business, with structured product categories and customer-facing content.
 - Built product browsing and enquiry workflows to help prospective buyers review products and submit requirements.

2026
- Freelance Web Developer - 22 Constanzaa

Client project | 22constanzaa.netlify.app

- Designed and developed a responsive restaurant website MVP with a modern, customer-focused interface and structured restaurant/menu presentation.
 - Implemented mobile-friendly layouts and interactive website sections, then deployed the client MVP using Netlify.

2026

PROJECTS

- Agentic AI Smart Campus Incident & Complaint Management System

Individual Capstone Project | Next.js, TypeScript, Prisma ORM, SQLite

- Developed an AI-powered campus complaint platform supporting end-to-end complaint lifecycle management; integrated Groq LLM for categorization, prioritization, and sentiment analysis.
 - Implemented duplicate detection using Jaccard similarity, AI-assisted ticket routing, YOLO-based infrastructure-fault image analysis, technician GPS tracking, real-time dashboards, email notifications, and feedback management.

2026
- AI Powered HR Query & Leave Management System

Individual Capstone Project | Python, Streamlit, REST APIs, LLM Integration

- Developed an AI-powered HR query automation system with role-based authentication for employees and administrators.
 - Built an interactive dashboard for real-time HR query handling and leave-request tracking.

2025
- Phishing Website Detection using Machine Learning

Group Project | Decision Tree, Logistic Regression, SVM

- Built a phishing website detection model and performed feature engineering on website attributes including URL length and domain age.
 - Achieved 92% accuracy in phishing detection across test datasets.

2024

EDUCATION

- Vellore Institute of Technology, Vellore, Tamil Nadu, India

M.Tech (Integrated) Software Engineering - CGPA: 7.6 / 10

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Software Engineering, Machine Learning

2021 - 2026

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript
Web Technologies: HTML, CSS **Frameworks:** React.js, Next.js, Spring Boot, Streamlit
Databases & ORM: MySQL, SQLite, Prisma ORM
Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Kaggle
AI/ML: LLMs, YOLOv8, Sentiment Analysis, Computer Vision
Concepts: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems, REST APIs, SDLC

CERTIFICATIONS

- Azure AI-900 Fundamentals - Microsoft
 - MySQL and Relational Databases - IBM
 - React.js Developer Assessment - LearnTube
 - Exploratory Data Analysis - Infosys Springboard
